

**openflyers** team wish you a  
Merry Christmas and a  
Happy New Year!

## RESOURCE MANAGEMENT IN 3.0ALPHA RELEASE

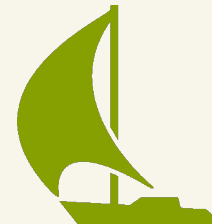

As part of its expansion to new markets, **openflyers** application had to extend the ability to manage resources other than aircraft. On the occasion of the arrival in December of the first "nautical" customer, the development team implements, right now, the "softening of the aircraft".

Thus, the concept of **resource** appears in 3.0alpha **openflyers** release, and replaces the term **aircraft**.

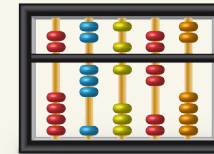

The primary goal is obviously to adapt **openflyers** to other activities than aeronautics such as driving schools, water sports, medical practices and leisure sports. However, this "softening" will also benefits to aviation as it will permit to manage related resources such as briefing rooms, life jackets, handheld GPS, etc.

Discover our solutions for each activity:

## FLIGHT MANAGEMENT - ACCOUNTANCY

You forecast to manage your flights with **openflyers** in 2012? To activate the accounting feature on your platform on January, 1<sup>st</sup> ?

Do not wait until next year to make these changes but contact us right now to perform these operations.

By doing so, you shall offer a smooth transition to your users and calmly deal with the New Year.

## ABOUT OPENFLYERS

Historically, **openflyers** is an internet solution to manage all the activities of aircraft structures such as flight schools, flying clubs or leasing companies. Leader in France in this market, more and more overseas customers use it thanks to its multilingual interface. Thus, nearly 25,000 pilots interact all over the world with **openflyers** to make their reservations, check their customer account balance or pay online by credit card. Furthermore, thanks to **openflyers**, aeronautical structures managers can fully manage the activities of their company or their association by internet: booking, billing, accounting, activity monitoring and maintenance.

Since November 2011, **openflyers** extends its application to other markets which provide services and require planning and booking management such as driving schools, water sports medical practices and leisure sports.

**openflyers**, this is also a development team composed of aviation or nautical specialists, and some of them are trainers. They are able to understand your needs and specificities and are committed to offer you a robust and sustainable solution, which evolves continuously.
